Quick Start Guide

Using the Kidney Disease Interactive Medicaid Dashboard

Medicaid Cost Estimates

This quick start guide describes the Medicaid Cost Estimates page within the Kidney Disease Interactive Medicaid Dashboard and provides instructions for accessing this page. You can navigate to different pages using the tabs found on the dashboard homepage, as illustrated in Figure 1.

Figure 1. Dashboard frontpage

To access the Medicaid cost estimates page, you will need to select **VIEW DASHBOARD** in the **MEDICAID COST ESTIMATES-2022** text box.

On the page, you can first view estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD for the state of Michigan, as illustrated in Figure 2.

Figure 2. Estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD

Below this you can view the following graphical displays:

- Comparison of estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD
- Estimated Medicaid costs per adult beneficiary per year by CKD stage identified in lab data or Medicaid claims
- Estimated Medicaid costs per person per year by CKD and [Measure]

You can also find details about the dashboard in the Notes section.

1. Dropdown menu

Within the **Medicaid Coverage** dropdown menu, you can select one of the four Medicaid coverage types:

- All Medicaid coverage groups
- Medicare & Medicaid Duals
- Medicaid FFS, non-Duals
- Managed Care, non-Duals

Within the **Care Setting** dropdown menu, you can select one of the seven care settings:

- All care settings
- Inpatient
- Outpatient hospital
- Clinic
- Nursing facility
- Drug
- Other

Within the **Age Group** menu, you can select one of the four age groups:

- All age groups
- Age 18-40
- Age 41-65
- Age > 65

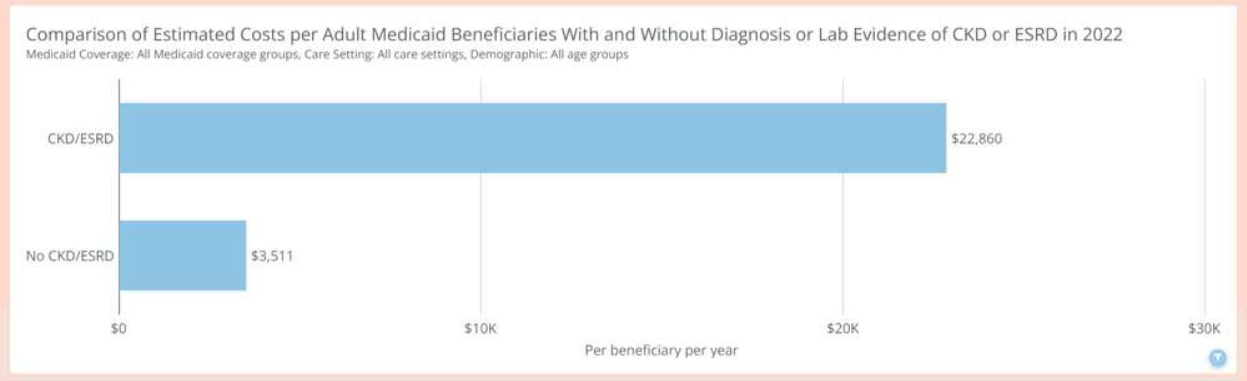

Figure 3. Dropdown Menu

2. Comparison of estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD

This graphical display is a bar chart showing estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD for the selected Medicaid coverage, care setting, and age group. For example, Figure 4 shows the estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD, for all Medicaid coverage groups, all care settings, and all age groups, in 2022.

Figure 4. Comparison of estimated costs per adult Medicaid beneficiaries with and without diagnosis or lab evidence of CKD or ESRD in 2022

3. Estimated Medicaid costs per adult beneficiary per year by CKD stage identified in lab data or Medicaid claims

This graphical display is a bar chart showing the estimated Medicaid costs per adult beneficiary per year by CKD stage, for the selected Medicaid coverage, care setting, and age group. For example, Figure 5 shows the estimated Medicaid costs per adult beneficiary per year by CKD stage, for all Medicaid coverage groups, all care settings, and all age groups, in 2022.

Figure 5. Estimated Medicaid costs per adult beneficiary per year by CKD stage identified in lab data or Medicaid claims in 2022

4. Estimated Medicaid costs per person per year by CKD and [Measure]

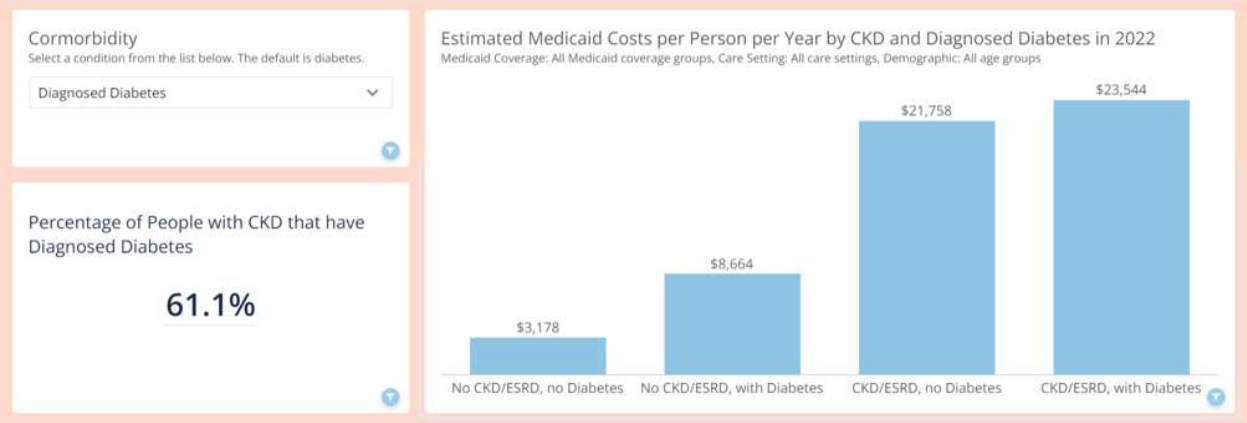

This graphical display is a bar chart showing estimated costs per adult Medicaid beneficiary with CKD/ESRD and with and without the selected comorbidity, as well as estimated costs per beneficiary without CKD/ESRD and with and without the selected comorbidity.

Within the **Comorbidity** dropdown menu, you can select one of five comorbidities:

- Diagnosed COVID
- Diagnosed Cardiovascular disease
- Diagnosed Depression
- Diagnosed Diabetes
- Diagnosed Hypertension

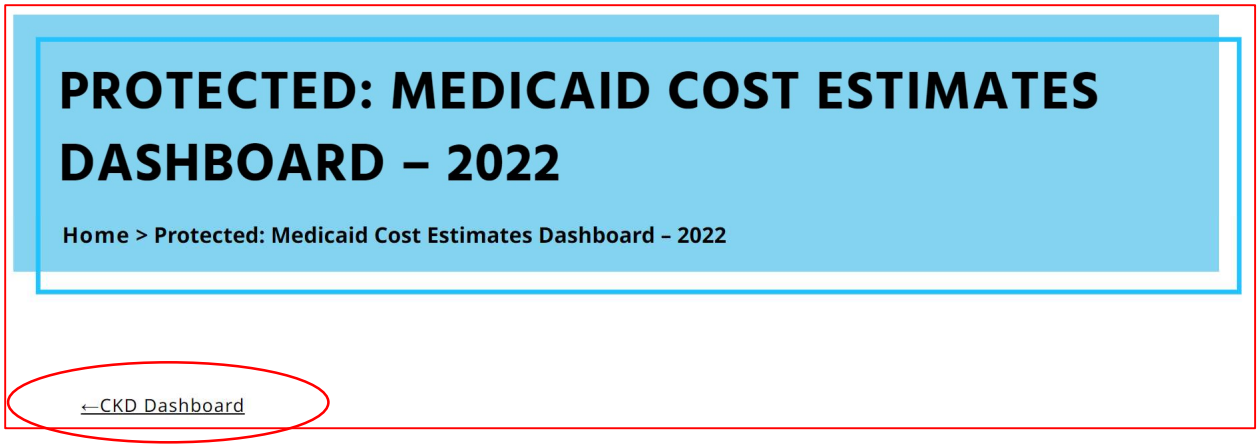

If you select 'Diagnosed Diabetes' from the Comorbidity dropdown menu you will see the graphical display shown in Figure 6. Figure 6 shows the estimated 2022 Medicaid costs per adult beneficiary per year for beneficiaries with CKD/ESRD and diagnosed Diabetes, beneficiaries with CKD/ESRD and not diagnosed with diabetes, beneficiaries without CKD/ESRD and diagnosed with diabetes and finally, beneficiaries without CKD/ESRD and not diagnosed with diabetes.
