Quick Start Guide

Using the Kidney Disease Interactive Medicaid Dashboard

Disparities by County

This quick start guide describes the Disparities by County page within the Kidney Disease Interactive Medicaid Dashboard and provides instructions for accessing this page. You can navigate to different pages using the tabs found on the dashboard homepage, as illustrated in Figure 1.

Figure 1. Dashboard frontpage

To access the disparities by county page, you will need to select **VIEW DASHBOARD** in the **DISPARITIES BY COUNTY-2022** text box. On the page, you can view the following graphical displays:

- Medicaid Adults with [Measure] by [Demographic Type], [County] in 2022, bar chart
- Medicaid Adults with [Measure] by [Demographic Type] map

You can also find details about the dashboard in the Notes section.

1. Dropdown menu

Within the **County** dropdown menu, you can select **MI** to view data for the state of Michigan or select a county to view data for the specific county.

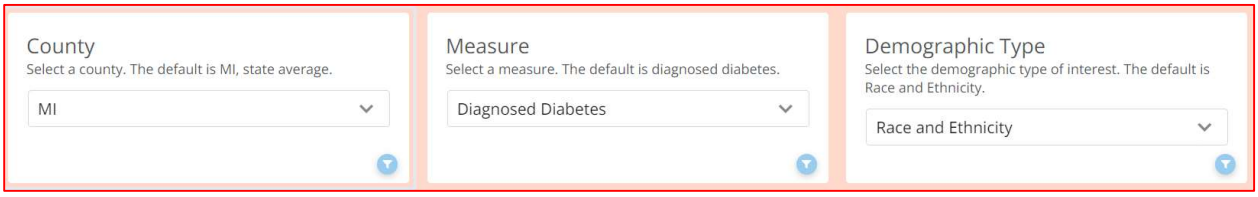

Within the **Measures** dropdown menu, you can select one of the four measures:

- CKD Screening-Diabetes
- Diagnosed CKD
- Diagnosed Diabetes
- Diagnosed Hypertension.

Within the **Demographic Type** dropdown menu, you can select to view data by one of the three demographics:

- Age
- Race and Ethnicity
- Sex

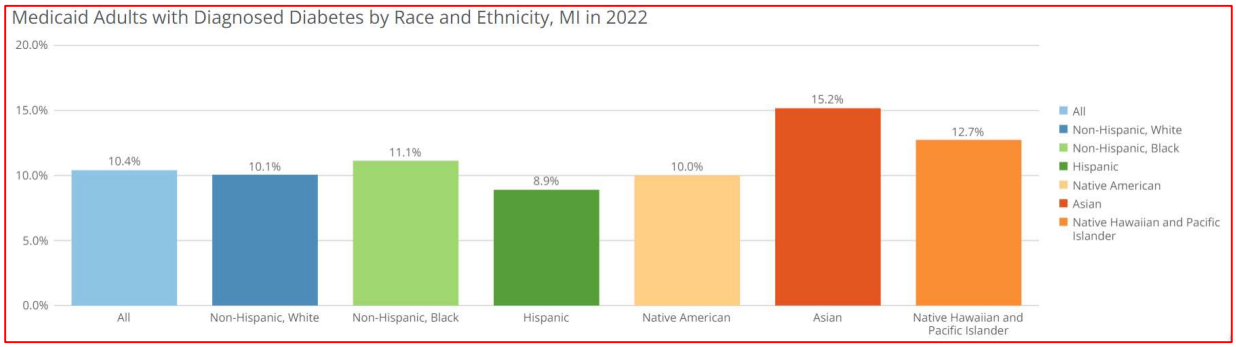

Figure 2. Dropdown menu

2. Medicaid Adults with [Measure] by [Demographic Type], [County] in 2022

This graphical display shows a bar chart of the selected measure for the selected county by the selected demographic type. For example, if you select 'MI' from the County dropdown menu, 'Diagnosed Diabetes' from the Measures dropdown menu, and 'Race and Ethnicity' from the Demographic Type dropdown menu, you will see the graphical display shown in Figure 3. Figure 3 shows the prevalence of diagnosed diabetes for the state of Michigan by race and ethnicity, with specific values presented in the table below.

Figure 3. Medicaid adults with diagnosed diabetes, the state of Michigan, by race and ethnicity

Medicaid Adults with Diagnosed Diabetes in 2022

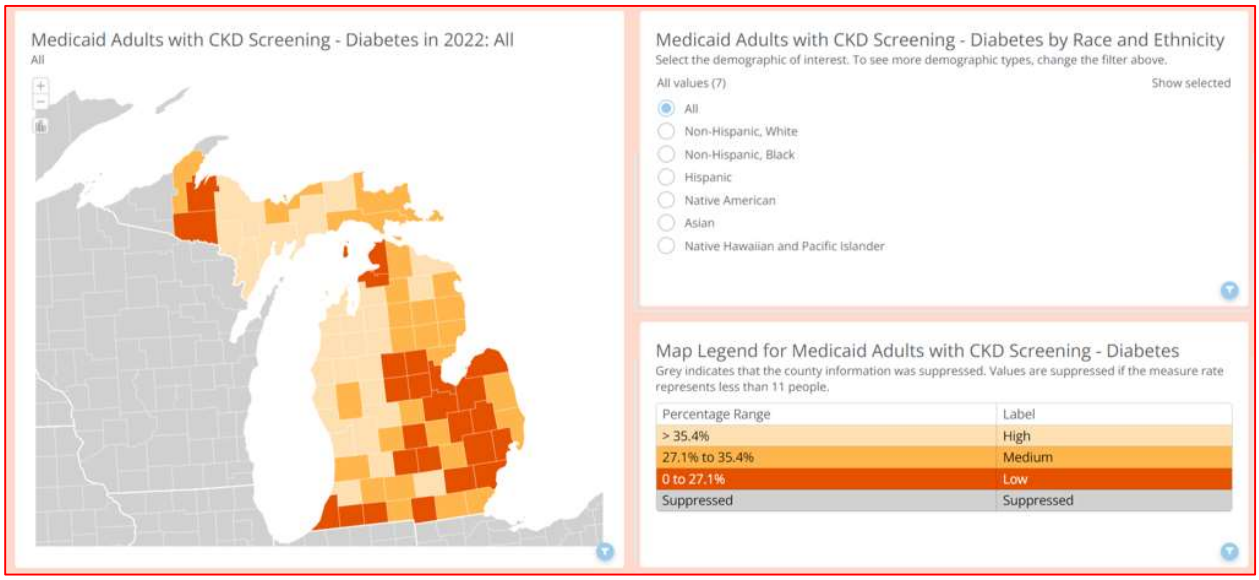

Grey indicates that the county information was suppressed. Values are suppressed if the measure rate represents 10 or less people

County	Demographic	Eligible Population	Numerator	Population Prevalence
MI	All	2,193,300	228,267	10.4%
	Non-Hispanic, White	1,274,280	128,222	10.1%
	Non-Hispanic, Black	575,581	64,096	11.1%
	Hispanic	134,123	11,936	8.9%
	Native American	29,692	2,973	10.0%
	Asian	13,596	2,063	15.2%
	Native Hawaiian and Pacific Islander	2,387	304	12.7%

3. Medicaid Adults with [Measure] by [Demographic Type] map

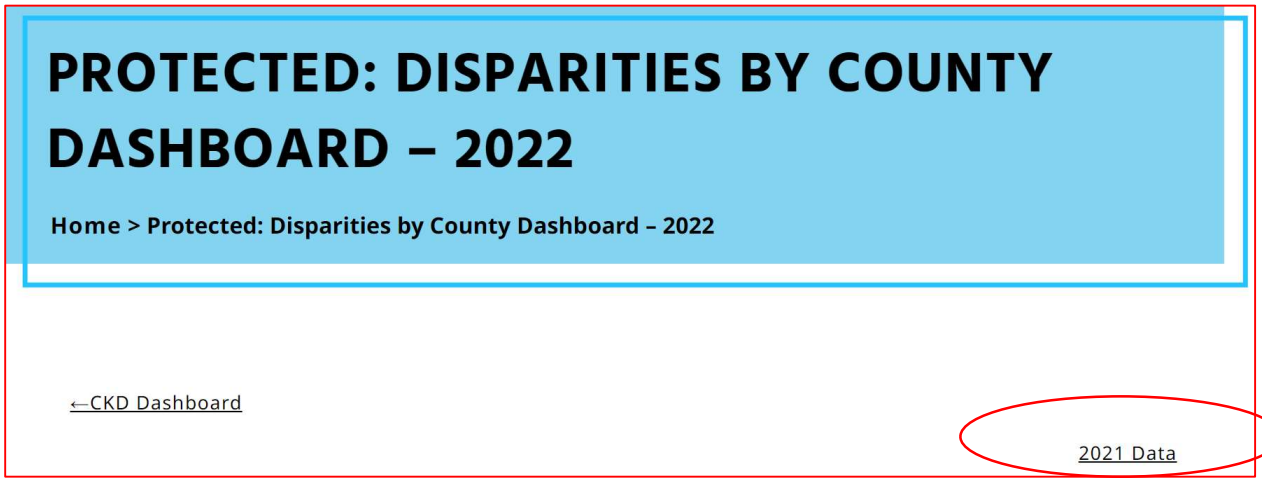

This graphical display is a county heat map showing the selected measure for each county among those with the selected race and ethnicity. For example, Figure 4 shows the percentage of Medicaid adults with diagnosed diabetes who received a CKD screening in 2022 in each county. Since 'All' is selected, the county level measures are not limited to a specific race/ethnicity group. Dark orange in Figure 4 indicates counties that had low rates of kidney health evaluation.

Figure 4. Medicaid Adults who received the kidney health evaluation, the state of Michigan, by county

4. View 2021 data

If you are interested in viewing data for the year of 2021, you can click **2021 Data** on the top right corner of the page. You can also click **CKD Dashboard** to go back to the main dashboard page.
